

Engineered Solutions

For All Your Mine Equipment Needs

At JADCO, we combine our unique chemistry and thermal heat-treating process to give you QT-PLUS® – Quality-Tough wear steel – a premium grade of alloy steel plate that offers 10 times the wear life of conventional mild steel.

Available in standard and cut-to-size dimensions, QT-PLUS features superior weldability, toughness, through-hardness, consistent properties and maximum ductility in manufacturing products requiring high hardness and tensile strength, including:

- > Buckets
- > Hoppers
- > Liners
- > Lips
- > Paddles
- > Plates
- > Screens

For a wear material that's easy to machine, drill, weld, flame-cut and bend, get QT-PLUS.

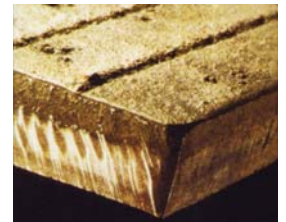

Our ChromeWeld 600™ is an exclusive overlay steel consisting of a mild steel backer plate, clad with proprietary overlay weld that is a cost-effective alternative to ceramic, and is ideal for surfaces requiring high levels of abrasion and impact resistance.

ChromeWeld's ability to be formed, welded, cut and machined makes it ideal for:

- > Cheek Plates
- > Chipper & Scarfer Hoods
- > Continuous & Longwall Miner Wear Parts
- > Drag & Shovel Bucket Liners
- > Fan Blade, Hopper & Mobile Equipment Liners
- > Haulage Systems
- > Skirt Boards

Depend on ChromeWeld 600™ to last under the harshest conditions.
